

Exercise 3: Stored Procedures

Scenario 1: Process Monthly Interest

Question

The bank needs to process monthly interest for all savings accounts.

```
CREATE OR REPLACE PROCEDURE ProcessMonthlyInterest
```

```
AS
```

```
BEGIN
```

```
    UPDATE Accounts
```

```
    SET Balance = Balance + (Balance * 0.01)
```

```
    WHERE AccountType = 'Savings';
```

```
COMMIT;
```

```
    DBMS_OUTPUT.PUT_LINE('Monthly interest processed successfully.');
```

```
END;
```

```
/
```

Execute

```
BEGIN
```

```
    ProcessMonthlyInterest;
```

```
END;
```

```
/
```

OUTPUT:

The screenshot shows the FreeSQL web interface. On the left is a Navigator panel with a tree view containing 'My Schema', 'Tables', and a search bar. Below these are expandable sections for 'ACCOUNTS', 'CUSTOMERS', 'EMPLOYEES', and 'LOANS'. The main workspace is divided into two parts. The top part is a SQL editor with a dark theme, showing a query: `BEGIN`, `END;`, and `SELECT * FROM Accounts;`. The bottom part is the 'Query result' tab, which displays a table with 5 columns: 'ACCOUNTID', 'CUSTOMERID', 'ACCOUNTTYPE', and 'BALANCE'. The table contains 3 rows of data. To the right of the main workspace is a 'SQL Tutorials' panel with a search bar and two tutorial cards: 'Creating Tables: Databases for...' and 'Joining Tables: Databases for...'. The bottom of the interface has a footer with various links and a copyright notice for 2015-2026.

	ACCOUNTID	CUSTOMERID	ACCOUNTTYPE	BALANCE
1	101	1	Savings	10201
2	102	2	Savings	15301.5
3	103	3	Current	20000

Scenario 2: Update Employee Bonus

CREATE OR REPLACE PROCEDURE UpdateEmployeeBonus(

p_Department IN VARCHAR2,

p_BonusPercent IN NUMBER

)

AS

BEGIN

UPDATE Employees

SET Salary = Salary + (Salary * p_BonusPercent / 100)

WHERE Department = p_Department;

COMMIT;

DBMS_OUTPUT.PUT_LINE('Employee bonus updated successfully.');

END;

/

Execute

BEGIN

 UpdateEmployeeBonus('IT',10);

END;

/
